## Portable Oil Test Set

The BA Breakdown Analyzer is the smallest and lightest portable oil test set its rating available. The 2.8" colour display (OLED) is very bright and offers optimal readability.

For measuring modern silicon, mineral and ester oils a very fast switch-off time after flash over is crucial. The BA has the fastest switch-off time on the market available (< 5 µs).

With the PC Software "BA Control Center" individual test procedures can be programmed and several units can be controlled and overviewed simultaneously. Test results are available in printed form, as pdf and as text files.

The unit has USB Flash Drive and a Bluetooth connection for communications between the test unit and the PC.
